

During the spring of 2014, Lot 6 (also known as the North Lot) is closed for renovation, Cernan Center patrons must park in the parking lots to the west of (i.e. one block behind) the Cernan Center. Vehicles may still drop off visitors directly in front of the building before parking in these areas. Handicapped parking and a small number of regular parking places are still available in front of the Cernan Center building. We apologize for the inconvenience during this renovation.
